eco and the future

eco kitchen's headquarter and factories are sited on the edge of some naturally beautiful countryside and close to wind farms contributing to the eco friendly power we all use.

The region boasts an eco friendly recycling of over 80% of all the waste taken to them.

The eco kitchen range is produced in conjunction with conscientious suppliers, board and mdf from FSC accredited manufacturers.

Our principles demand recycling of our own bi-products and also in the creation of central heating. 100% eco friendly, in manufacture it's not possible, but we try, and so can you, recyclables in one bin, perishables another etc.

In an imperfect world it's a start and every little helps.

Now enjoy living with your eco kitchen.
